Dhumbarahi,Kathmandu

TECHNICAL PROFILE:

B.Sc. CSIT student currently studying in 6th semester (year 3rd) at Trinity International College (TU). Currently specialized in Data Science with Python, focusing on building clean code and efficient data pipelines. Strong background in mathematical logic and technical problem-solving. Committed to mastering machine learning workflows, exposing and contributing to collaborative technical environments

CORE COMPETENCIES

- Languages: Python (Intermediate), (C, C++ Basics) , SQL.
- Data Science: Data Handling (Pandas, NumPy), Data Visualization (Matplotlib, Seaborn), and Preprocessing and more.
- Mathematics: Solid foundation in Linear Algebra, Calculus, and Statistics through rigorous CSIT coursework.

EDUCATION

B.Sc. Computer Science & Information Technology

Trinity International College (TU) | Semester 6 (Current)

+2 Science (Physics/Computer Science)

Soft Skills

- Capable of communicating in English at ease, and collaborating with groups as well

TECHNICAL TRAINING

Data Science with Python | TechAxis, Kumaripati (Completed)

- Applying Python to solve real-world data problems, from raw data ingestion to structured analysis. Building a deep understanding of data libraries to automate cleaning and feature scaling.

PROJECTS & APPLICATIONS

Financial Data Preprocessing & Cleaning

- Developed a system to handle large datasets using Pandas and NumPy.
- Implemented statistical techniques like IQR and Feature Scaling to ensure data quality for machine learning models.

Automated Data Extraction (Web Scraping)

- Engineered Python scripts using BeautifulSoup to collect and structure information from dynamic web sources.
